Credential report

New feature to generate a policy based on CloudTrail events.
AWS uses your CloudTrail events to identity the services and actions used and generate a least privileged policy that you can attach to this user.

Security recommendations 2

Add MFA for root user
Enable multi-factor authentication (MFA) for the root user to improve security for this account.

Add MFA for yourself
Add multi-factor authentication (MFA) for yourself to improve security for this account.
Add MFA

Your user, testuser01, does not have any active access keys that have been unused for more than a year.
Deactivating or deleting unused access keys improves security.
